LIGHTING

ChamSys MagicQ MQ40N Console – Remote Controlled

Five (5) Ovation F-165WW LED Fresnel

Twelve (12) Chauvet COLORado 2 Solo Zooming RGBW LED wash

VIDEO WALL – BACKDROP FOR 12' X 24' STAGE (LIVE STAGE VIEWING OR RECORDED GRAPHIC MATERIAL)

Permanently installed 20' x 10' Video Wall by Oracle LED Systems

- 4.8MM pixel pitch Black Widow Panel with an enhanced refresh rate to accommodate full motion video backdrops while presenting well on camera.
- The 4.8MM panels have a black background to provide rich contrast while minimizing glare on camera. The viewing angle is ideal from 140 degrees off axis in any direction.
- Video is processed by a Novastar VX4S All-In-One Scaler and Processor which features powerful front-end processing, so an external scaler is no longer needed.
- The ideal video raster size for custom content is 864 pixels wide by 432 pixels tall however the processor will scale non-conforming content.

Laptop control with remote available for PowerPoint presentations.
